10 of 11
T+7 Launch calls were real hits

50
Winter 2027 forecasts sealed before airing

01 — THE PROBLEM

Crore-sized bets, made almost blind

Platforms, licensors, cinema chains and dubbing studios choose which anime to bring to India with little India-specific evidence.

Three questions every India launch must answer

What should we license?

Which of ~50 new titles a season will actually travel to India?

When should we commit?

Months before the premiere, or after launch-week buzz?

Which language do we dub first?

Hindi, Tamil, Telugu, or subtitles only?

₹66 Cr

Demon Slayer: Infinity Castle, net, in Indian cinemas in about two weeks

¥20 T

Japan's 2033 target for overseas content sales, up from ¥5.8 T in 2023

<1 in 2,000

trailer comments use an Indian script. Indian fans type Hinglish.

15

anime reached Netflix India's weekly Top 10 since July 2021: hits are rare

Sources: box office, Outlook India Respawn (net, run still going); target, Japan's Cool Japan Strategy 2024; comment and chart figures, Yosoku's own data.

02 — AT A GLANCE

What makes Yosoku stand out

A verdict with its reasons for every title, built on signals that actually come from India.

20×

Hinglish-aware AI

AI4Bharat's IndicLID plus our Hindi word rules find 20× more Indian fan comments.

Three-stage forecast

Cold, T−28 and T+7 verdicts: Launch, Test-market or Hold, each with an 80% range.

Launch plan per title

Commit or test small, when to decide again, which dub first, keep or move the date.

Region & language hubs

Which Indian language hub a title pulls, and dub demand against a typical title.

Downloadable overview

One-click one-page brief in English, or a Japanese 稟議書 ready for approval.

Check your title

Describe any title and see how similar anime fared in India, with what-ifs.

Demand Guide service

Extensible: new markets, signals and content plug into the same engine.

Sealed & honest

Forecasts sealed with SHA-256 before airing. If a simple rule wins, the rule ships.

From public signals to a launch verdict

Public data only, collected every day for the titles still in play. The model reruns all 1,400 titles in about 30 seconds.

Train 2019–23, check 2024, test 2025 once: always on unseen titles

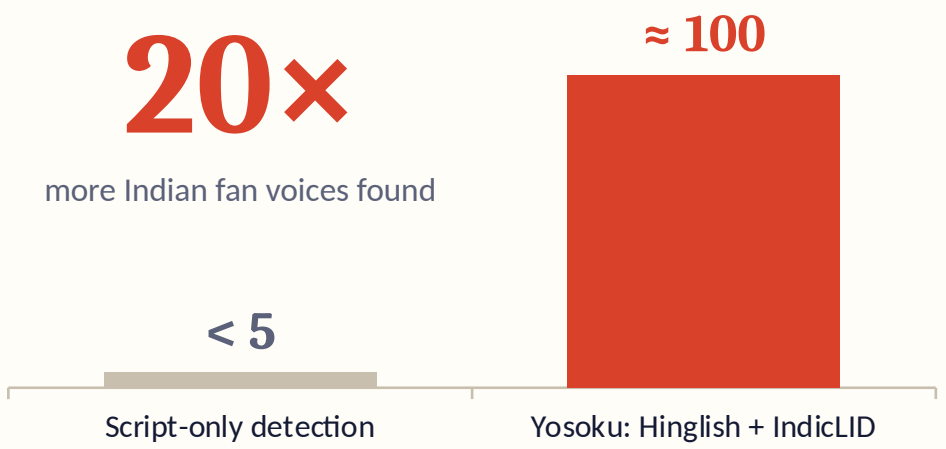

No hindsight: a test fails the build if any input post-dates its forecast

Responsible data: official APIs, no usernames, counts instead of text

We read Hinglish: 20× more Indian signal

Indian fans comment in Hinglish typed in Latin letters, not in Indian scripts, so script-based detection misses almost all of them.

Indian fan comments found, per 10,000 trailer comments

How each comment is read

1. **Word rules**
   Indian scripts, Hinglish words (two strong, or one strong plus two common) and India, city or language names
2. **AI4Bharat IndicLID, run on our own machine**
   A romanized fastText model confirms short Hinglish the rules miss (p ≥ 0.5, 3+ words, 2+ Hindi words); no text leaves the machine
3. **Signals out**
   India-fan flag → Demand Index · language hub → region map · dub and where-to-watch asks → Demand Guide

✓ **"Kab release hogi ye movie"**
caught by IndicLID, not by word rules

× **Spanish, Indonesian, emoji**
IndicLID false alarms we filter out

561 → 858
Hinglish comments found once IndicLID was added (+53%)

41 → 107
of 200 titles now carry an India signal (2.6×)

167,323
Latin-letter comments labelled; new ones every day

0.66 → 0.32
T+7 accuracy without trailer comments: our most valuable input

Every title, one verdict, three moments

Each title gets a verdict at three points of its release cycle, with an honest range and the evidence behind it.

1 Downloadable one-page overview

English brief: verdict, range, drivers and launch plan, one click to PDF

稟議書 (ringi-sho): the Japanese approval paper, with conclusion, grounds, precedents, risks, next dates and seal boxes

2 Three forecast moments

Cold
any time: genre, studio and the closest past titles

T−28
4 weeks before the premiere, adding early buzz

T+7
1 week after, adding launch week (a nowcast)

3 An honest 80% range sets the verdict

Launch
whole range above the line

Test-market
range straddles: test small

Hold
whole range below the line

Proven on titles the model never saw

Trained on 2019–2023, then checked on 52 titles from 2024 it had never seen. Every number below comes from that held-out season.

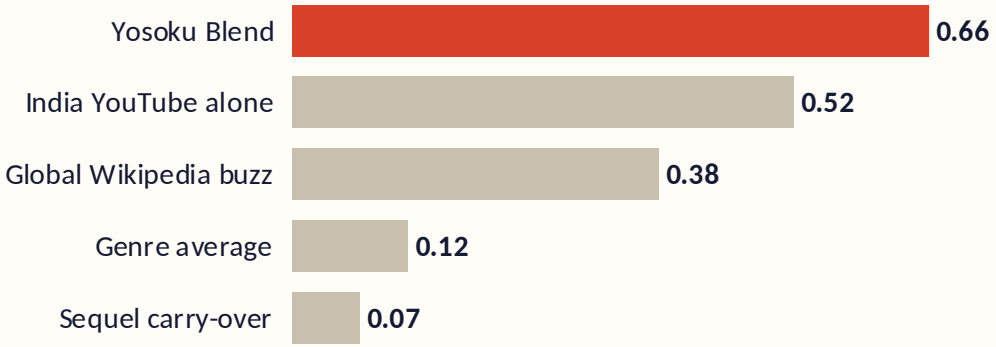

10 of 11
T+7 Launch calls in India's real top third, against 1 in 3 by chance

4 of 4
T−28 Launch calls, 4 weeks before the premiere, were real hits

0.66
T+7 rank accuracy, against 0.52 for the best simple rule

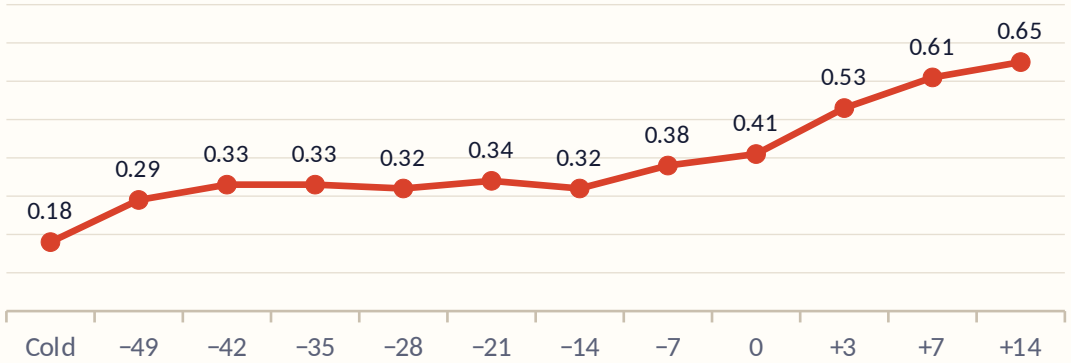

8.4 pts
average T+7 miss on the 0–100 index; best simple rule: 9.5

Who ranks India demand best? (T+7, 2024 titles)

Rank accuracy: 1 = perfect order, 0 = chance. The Blend is our model; the rest are simple rules anyone could apply.

When will we know? A forecast made on each day

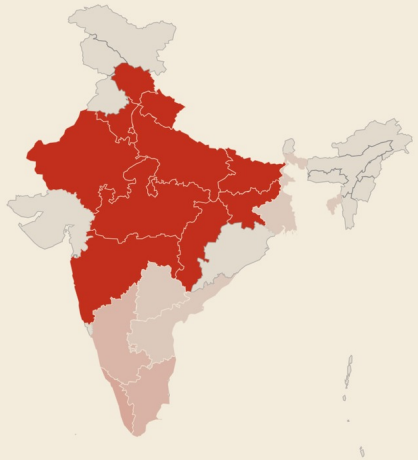

Days from the Japanese premiere. Waiting before it buys little (0.29 → 0.38); day 0 → +3 is the jump (0.41 → 0.53). So: license small early, decide the dub on day 3–7.

Where in India, and which dub first

Every title gets a language-hub map and a dub-demand score, read from Indian fans of its closest past titles.

Where in India language hubs

Hindi	Hindi belt: UP, Bihar, MP, Rajasthan, Delhi, Haryana and neighbours (also Marathi)	80%
Malayalam	Kerala	12%
Tamil	Tamil Nadu	5%
Kannada	Karnataka	3%
Bengali	West Bengal, Tripura	0%
Telugu	Andhra Pradesh, Telangana	0%

Estimated from **37** trailer comments that point to a language (its script, its name, or Hinglish for Hindi) on the 6 closest past titles that had any. English-speaking fans are spread across India and are not counted here; Hindi includes Marathi.

Dub demand from fans of similar titles

10% of Indian trailer comments on the 6 closest past titles asked for or about a Hindi, Tamil or other Indian-language dub, against 25% for a typical past title.

1,090

Indian comments asking for a dub, on 68 titles

91%

of language-tagged Indian comments are Hindi or Hinglish

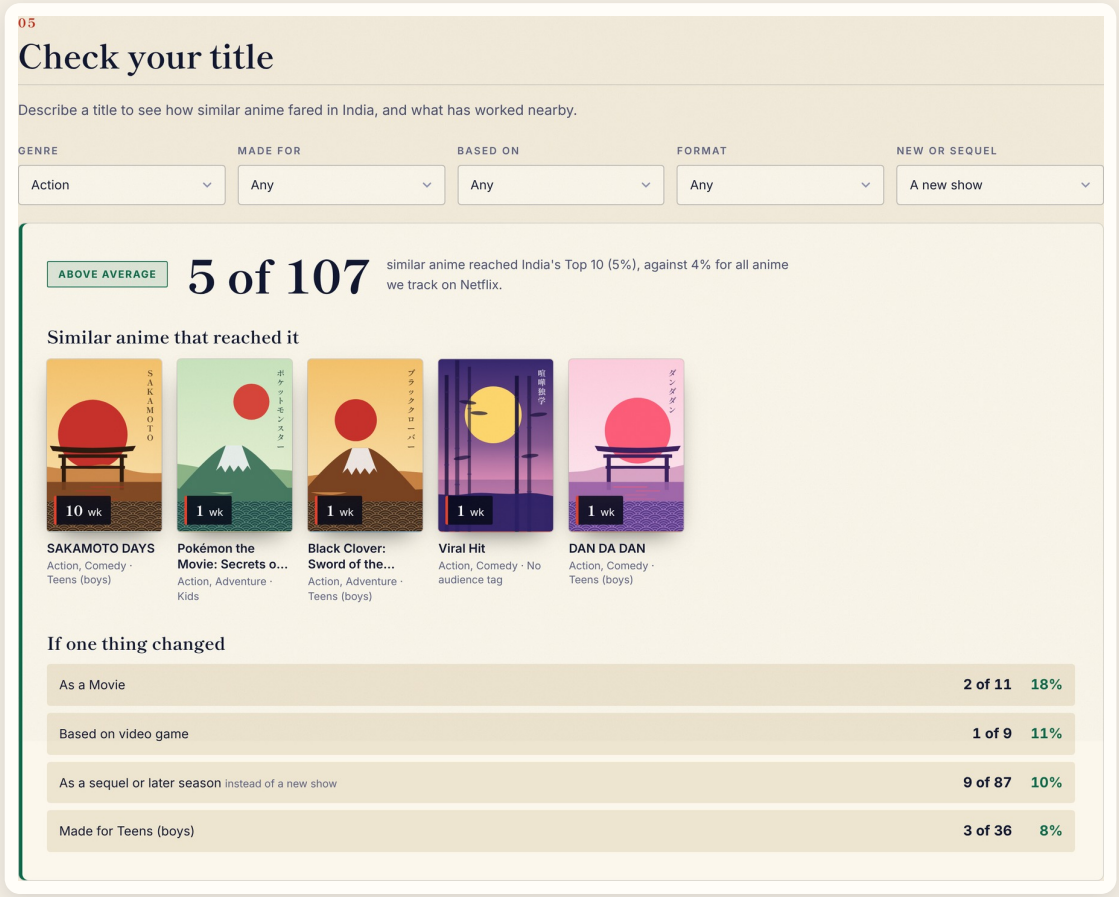

Dub requests by language

- Launch plan: subtitles first, a Hindi dub if early viewing shows demand
- A ‘thin evidence’ flag when a map rests on under 30 comments
- Release-window what-if: festive season, board exams, IPL

Demand Guide: an extensible service

Built only from what India has watched and said, so it helps even sellers whose own title is unlikely to work.

Four views, one guide

1. **What India actually watched**
   15 anime reached Netflix India's Top 10 in 277 weeks
2. **What kind of title gets there**
   split by genre, audience, source, format, new or sequel
3. **What India is asking for**
   1,197 asks on 68 titles: Solo Leveling S2 (173), Infinity Castle (146), Suzume (103)
4. **Check your title ◂ shown left**
   describe a title: similar anime that charted, plus ‘if one thing changed’

Extensible by design: plug in

+ New market
one line of config: Indonesia, Thailand, Brazil, Mexico ready

+ New signal
streaming availability → titles India asks for and cannot get

+ New content
K-dramas, Japanese films, Indian films abroad

+ New delivery
API, Excel slate, alerts in Slack, Teams or LINE WORKS

Business model and where we go next

One wrong rights deal or dub costs more than years of a subscription, and serving one more title costs close to nothing.

Who pays

Indian streaming & TV
what to license, when, and whether to dub

Japanese studios & licensors
which titles to offer India, at what price

Cinema chains
which anime films, in which languages

Dubbing studios
which titles and languages to pitch

How we earn

Season subscription
every new title at all three stages, refreshed daily

Per-title briefs
one-page overview, in English or as a 稟議書

Partner tier
adds a platform's own pre-launch signals

Accuracy guarantee
a season free if under 70% land in range, once proven

Future expansion
